PEACE OF MIND AND SECURITY
WITH NEVELUS AERO

INDOOR & OUTDOOR VIDEO LIVE MOTIONVIEWER

The indoor NVL IFS 100 and outdoor NVL FS 100 MotionViewer are fully wireless and battery operated.

These cameras are equipped with the Video Live function, which allows:

- More efficient security: instant video transmission to the central station in case of intrusion.
- Greater peace of mind: see live what happens at home at any time of the day.

THE NEVELUS AERO VIDEO LIVE CONCEPT

With the constant desire to improve the connectivity, remote interaction and ergonomics of its security systems, Aero provides a complete and innovative Cloud&Video Live solution.

The Aero Cloud will help installation and maintenance. It will provide new interaction interfaces for the end-user and the installer. New advanced functionalities will be available, like reporting, advanced configuration, or Video Live. The Aero Cloud&Video Live solution is compatible with mains-powered W panels working on firmwares 08.10.XX and later.

Quality

Nevelus Aero products comply with local and international certifications: CE, EN50131-Grade 2, NFA2P 2 boucliers (Europe), IDA (Singapore), A-Tick (Australia), ICASA (South Africa), FCC, IC, PTCRB (North America), and are manufactured in certified factories in France ISO9001 and ISO/TS16949.

INDOOR RESIDENTIAL PROTECTION

PROTECT YOUR HOME WITH VIDEO LIVE VERIFICATION

Our new product generation brings you colour video verification.

Upon an intrusion, MotionViewer cameras take a ten second video. The video is immediately transmitted to your Alarm Receiving Centre (ARC).

The operator at the ARC watches the video and can instigate a fast response in the case of a video verified intrusion.

No alarm / no camera. The camera is ONLY activated in the event of an alarm.

Nevelus Aero products do not allow operators to watch what is happening in your home, except in the event of an alarm or panic alarm.

With Nevelus Aero, security respects your privacy!

INDOOR PROTECTION

WITH NEVELUS AERO, PROTECT YOUR HOME...BEFORE THE BURGLAR GETS IN!

NEVELUS AERO, A 100% DETERRENT SYSTEM!

Don't wait for burglars to break your doors and windows: the Aero system protects and deters BEFORE the break-in occurs!

If intruders attempt to enter your property via your yard, terrace or garden, Nevelus Aero cameras will detect their presence, film them and notify your monitoring station of the danger and the reality of the intrusion.

Sirens and outdoor sirens with flashing lights are additional deterrence features of the alarm system. By creating a surprise effect, the triggering of the sirens will deter the intruders and alert your neighbours. The siren's powerful flashing light makes it easy to locate the source of the alarm.

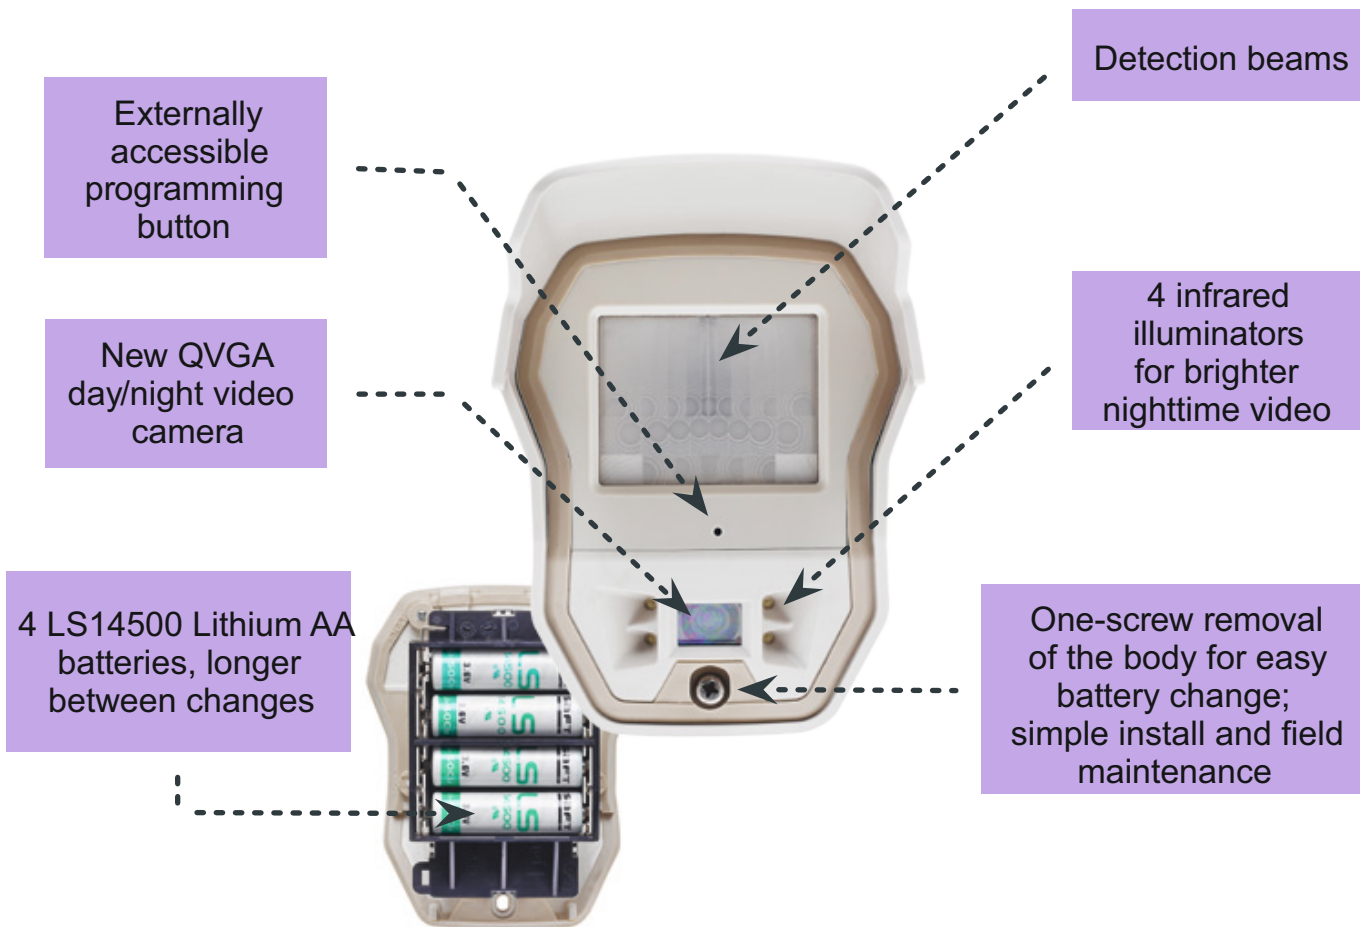

In case of an intrusion or real danger, law enforcement can be quickly dispatched.

PERIMETER PROTECTION

OUTDOOR PROTECTION

ALWAYS KEEP AN EYE ON YOUR FAMILY...

From your office, holidays or anywhere in the world, the APPLICATION allows you to check Nevelus Aero systems on your smartphone.

It's a real interactive tool between you and the panel. The APPLICATION allows you to genuinely APPreciate your security system.

With the smartphone APPLICATION, all Aero products can be connected to your phone or your tablet for Video Live.

What is happening at home ? Who is there? Did I arm my system?

The smartphone application integrates multiple functions, accessed remotely to meet your needs: check the status, arm or disarm your system, take photos or videos in real time, store your images to view them later, temporarily disarm a room, etc...

With Aero, be Autonomous, Interactive, Connected ... and APPreciate your security!

NO SURPRISES!

Control what happens at all times!

No more surprises, with the Video Live function you can follow in real time what is happening in your home, which could save a lot of aggravation!

Easy to operate, user-friendly and ergonomic, Nevelus Aero systems offer you peace of mind at your fingertips.
